

## Dashboard

As a leading, software-focused pharmacy, we offer a REST API which you can integrate into your clinics's software.

## Authentication

The API secured with an API key which can be obtained by contacting customer service as only select clinics are allowed to submit scripts via our API.

Example

[https://portal.absoluterx.com/api/clinics/products?api\\_key=AAAAAAAA-BBBB-CCCC-DDDD-EEEEEEEEEEEE](https://portal.absoluterx.com/api/clinics/products?api_key=AAAAAAAA-BBBB-CCCC-DDDD-EEEEEEEEEEEE)

## GET /api/clinics/physicians

Returns a paginated list of physicians belonging to your clinic.

Optional Filters

**page**

string

example 1

The page of the results you want returned.

**id**

string

example 123456789

The ID of the prescriber.

**dea\_number**

string

example BB1388568

The prescriber's DEA number.

**npi\_number**

string

example 1234567891

The prescriber's NPI number.

**first\_name**

string

example John

The prescriber's first name.

**middle\_name**

string

example Michael

The prescriber's middle name.

**last\_name**

string

example Doe

The prescriber's last name.

## POST /api/clinics/physicians

Create a new physician record.

Input Fields

**first\_name**

string

**REQUIRED**

example John

The first name of the prescriber.

**middle\_name**

string

**OPTIONAL**

example Michael

The middle name of the prescriber.

**last\_name**

string

**REQUIRED**

example Doe

The last name of the prescriber.

**phone\_number**

string

**REQUIRED**

example 7778889999

The prescriber's valid 10 digit phone number.

**licenses**

array of objects

**OPTIONAL**

List of the the prescriber's licenses.

object

**REQUIRED**

**state**

string

**REQUIRED**

example Montana

**number**

string

**REQUIRED**

example 12345

**type**

string

**REQUIRED**

Options: MEDICAL, CONTROLLED\_SUBSTANCE\_REGISTRATION\_(CSR), PA,

ARNP, OD

example MEDICAL

**expires\_on**

string

**REQUIRED**

example 2022-06-31

**street**

string

**REQUIRED**

example 123 SomeStreet

**street\_2**

string

**OPTIONAL**

example APT 123

**city**

string

**REQUIRED**

example Lutz

**state**

string

**REQUIRED**

example FL

**zip**

string

**REQUIRED**

example 33549

**Request Sample**

```
{

```

## POST /api/clinics/licenses

Create a new license record for a given physician.

### Input Fields

#### **physician\_id**

string

#### **REQUIRED**

example 123456789

The id number of the prescriber.

#### **number**

string

example ABC123

The license number.

#### **state**

string

example Texas

The license state.

#### **type**

string

Options: MEDICAL, CONTROLLED\_SUBSTANCE\_REGISTRATION\_(CSR), PA, ARNP, OD

example Texas

The license type.

#### **expires\_on**

string

example 2023-01-01

The license expiration date.

### Request Sample

```
{
  "physician_id": 1,
  "number": "123456789",
  "state": "Texas",
  "type": "MEDICAL",
  "expires_on": "2023-01-01"
}
```

### Response Sample

```
{
  "data": {
    "id": 1,
    "physician_id": 1,
    "state": "Texas",
    "number": "123456789",
    "type": "MEDICAL",
    "expires_on": "2023-01-01",
  }
}
```

```

    "approved": 1,
    "expired": false,
    "api": {
      "get": {
        "url": "https://portal.absoluterx.com/api/clinics/licenses/1?
api_key=<api_key>",
        "method": "GET",
        "axios_method": "get"
      },
      "update": {
        "url": "https://portal.absoluterx.com/api/clinics/licenses/1?

        "axios_method": "delete"
      }
    }
  }
}

```

## GET /api/clinics/licenses/{id}

Returns a single license record.

### Response Sample

```

{
  "data": {
    "id": 1,
    "physician_id": 1,
    "state": "Texas",
    "number": "123456789",
    "type": "MEDICAL",
    "expires_on": "2023-01-01",
    "approved": 1,
    "expired": false,
    "api": {
      "get": {
        "url": "https://portal.absoluterx.com/api/clinics/licenses/1?
api_key=<api_key>",
        "method": "GET",
        "axios_method": "get"
      },
      "update": {
        "url": "https://portal.absoluterx.com/api/clinics/licenses/1?
api_key=<api_key>",
        "method": "PUT",
        "axios_method": "put"
      },
      "delete": {
        "url": "https://portal.absoluterx.com/api/clinics/licenses/1?
api_key=<api_key>",
        "method": "DELETE",
        "axios_method": "delete"
      }
    }
  }
}

```

```
}
  }
}
```

## PUT /api/clinics/licenses/{id}

Update an existing physician's license record.

### Input Fields

#### **number**

string

example ABC123

The license number.

#### **state**

string

example Texas

The license state.

#### **type**

string

Options: MEDICAL, CONTROLLED\_SUBSTANCE\_REGISTRATION\_(CSR), PA, ARNP, OD

example Texas

The license type.

#### **expires\_on**

string

example 2023-01-01

The license expiration date.

### Request Sample

```
{
  "number": "123456789",
  "state": "Texas",
  "type": "MEDICAL",
  "expires_on": "2023-01-01"
}
```

### Response Sample

```
{
  "data": {
    "id": 1,
    "physician_id": 1,
    "state": "Texas",
    "number": "123456789",
    "type": "MEDICAL",
    "expires_on": "2023-01-01",
    "approved": 1,
    "expired": false,
    "api": {
      "get": {
        "url": "https://portal.absoluterx.com/api/clinics/licenses/1?api_key=<api_key>",
        "method": "GET",
        "axios_method": "get"
      },

```

```

        "update": {
            "url": "https://portal.absoluterx.com/api/clinics/licenses/1?
api_key=<api_key>",
            "method": "PUT",
            "axios_method": "put"
        },
        "delete": {
            "url": "https://portal.absoluterx.com/api/clinics/licenses/1?
api_key=<api_key>",
            "method": "DELETE",
            "axios_method": "delete"
        }
    }
}
}

```

## DELETE /api/clinics/licenses/{id}

Delete a individual license record.

## GET /api/clinics/patients

Returns a paginated list of patients belonging to your clinic.

Optional Filters

**page**

string

example 1

The page of the results you want returned.

**id**

string

example 123456789

The ID of the patient.

**dob**

string

example 1980-01-01

The patients date of birth.

**email**

string

example john@doe.com

The patients email address.

**first\_name**

string

example John

The patients first name.

**middle\_name**

string

example Michael

The patients middle name.

**last\_name**

string

example Doe

The patients last name.

#### Response Sample

```

## POST /api/clinics/patients

Create a new patient record.

Input Fields

**first\_name**

string

**REQUIRED**

example John

The first name of the patient.

**middle\_name**

string

**OPTIONAL**

example Michael

The middle name of the patient.

**last\_name**

string

**REQUIRED**

example Doe

The last name of the patient.

**dob**

string

**REQUIRED**

example 1980-01-01

The patients date of birth. Must be 18 years or older.

**gender**

string

**REQUIRED**

Options: Male, Female

The patients gender.

**allergies**

array of objects

**OPTIONAL**

List of the patients allergies.

object

**REQUIRED**

**name**

string

**REQUIRED**

example Tree Pollen

**diseases**

array of objects

**OPTIONAL**

List of the patients diseases.

object

**REQUIRED**

**name**

string

**REQUIRED**

example Heart Disease

**medications**

array of objects

**OPTIONAL**

List of the patients medications.

object

**REQUIRED**

**name**

string

**REQUIRED**

example Tylenol

**strength**

string

**REQUIRED**

example 100mg

**email**

string

**REQUIRED**

example john@doe.com

The patients email address.

**phone\_number**

string

**REQUIRED**

example 7778889999

The patients 10 digit phone number.

**address**

object

**REQUIRED**

The address the patient is located at.

**street**

string

**REQUIRED**

example 123 SomeStreet

**street\_2**

string

**OPTIONAL**

example APT 123

**city**

string

**REQUIRED**

example Lutz

**state**

string

**REQUIRED**

example FL

**zip**

string

**REQUIRED**

example 33549

#### Request Sample

}
```

## **PUT** /api/clinics/patients/{id}

Update an existing patient record.

Input Fields

**first\_name**

string

**REQUIRED**

example John

The first name of the patient.

**middle\_name**

string

**OPTIONAL**

example Michael

The middle name of the patient.

**last\_name**

string

**REQUIRED**

example Doe

The last name of the patient.

**dob**

string

**REQUIRED**

example 1980-01-01

The patients date of birth. Must be 18 years or older.

**gender**

string

**REQUIRED**

Options: Male, Female

The patients gender.

**allergies**

array of objects

**OPTIONAL**

List of the patients allergies.

object

**REQUIRED**

**name**

string

**REQUIRED**

example Tree Pollen

**diseases**

array of objects

**OPTIONAL**

List of the patients diseases.

object

**REQUIRED**

**name**

string

**REQUIRED**

example Heart Disease

**medications**

array of objects

**OPTIONAL**

List of the patients medications.

object

**REQUIRED**

**name**

string

**REQUIRED**

example Tylenol

**strength**

string

**REQUIRED**

example 100mg

**email**

string

**REQUIRED**

example john@doe.com

The patients email address.

**phone\_number**

string

**REQUIRED**

example 7778889999

The patients 10 digit phone number.

**address**

object

**REQUIRED**

The address the patient is located at.

**street**

string

**REQUIRED**

example 123 SomeStreet

**street\_2**

string

**OPTIONAL**

example APT 123

**city**

string

**REQUIRED**

example Lutz

**state**

string

## REQUIRED

example FL

**zip**

string

## REQUIRED

example 33549

## GET /api/clinics/allergies

Returns a paginated list of allergies of your patients.

Optional Filters

**page**

string

example 1

The page of the results you want returned.

**patient\_id**

string

example 123456789

The ID of the patient.

**name**

string

example Pollen

The the name, or partial name, of the allergy.

Response Sample

```

## POST /api/clinics/allergies

Create a new allergy record for a given patient.

### Input Fields

#### patient\_id

string

**REQUIRED**

example 123456

The id number of the patient.

#### name

string

**OPTIONAL**

example Tree Pollen

The name of the allergy.

### Request Sample

```

{
  "patient_id": "123456789",
  "name": "Tree Pollen"
}

```

### Response Sample

```

{
  "data": {
    "id": 1,
    "patient_id": "123456789",
    "name": "Tree Pollen",
    "created_at": "2019-08-11T22:50:02.000000Z",
  }
}

```

```

## PUT /api/clinics/allergies

Update an existing allergy record for a given patient.

### Input Fields

**name**

string

## OPTIONAL

example Tree Pollen

The name of the allergy.

### Request Sample

```
{
  "name": "Pollen"
}
```

### Response Sample

```
{
  "data": {
    "id": 1,
    "patient_id": "123456789",
    "name": "Pollen",
    "created_at": "2019-08-11T22:50:02.000000Z",

      },
      "delete": {
        "url": "https://portal.absoluterx.com/api/clinics/allergies/1?
api_key=<api_key>",
```

```

        "method": "DELETE",
        "axios_method": "delete"
    }
}
}
}

```

## GET /api/clinics/diseases

Returns a paginated list of diseases of your patients.

### Optional Filters

#### page

string

example 1

The page of the results you want returned.

#### patient\_id

string

example 123456789

The ID of the patient.

#### name

string

example Heart Disease

The the name, or partial name, of the disease.

### Response Sample

```

{
  "data": [
    {
      "id": 1,
      "patient_id": "123456789",
      "name": "Heart Disease",

}

```

## POST /api/clinics/diseases

Create a new disease record for a given patient.

### Input Fields

#### patient\_id

string

**REQUIRED**

example 123456789

The id number of the patient.

#### name

string

**OPTIONAL**

example Heart Disease

The name of the disease.

### Request Sample

```

{
  "patient_id": "123456789",
  "name": "Heart Disease"
}

```

### Response Sample

```

{
  "data": {
    "id": 1,
    "patient_id": "123456789",
    "name": "Heart Disease",
    "created_at": "2019-08-11T22:50:02.000000Z",
    "updated_at": "2020-08-03T15:36:35.000000Z",
    "deleted_at": null,
    "api": {
      "update": {
        "url": "https://portal.absoluterx.com/api/clinics/diseases/1?api_key=<api_key>",
        "method": "PUT",
        "axios_method": "put"
      },
      "delete": {
        "url": "https://portal.absoluterx.com/api/clinics/diseases/1?api_key=<api_key>",
        "method": "DELETE",
        "axios_method": "delete"
      }
    }
  }
}

```

```
}
  }
}
```

## GET /api/clinics/diseases/{id}

Returns a single disease record.

### Response Sample

```
{
  "data": {
    "id": 1,
    "patient_id": "123456789",
    "name": "Heart Disease",
    "created_at": "2019-08-11T22:50:02.000000Z",
    "updated_at": "2020-08-03T15:36:35.000000Z",
    "deleted_at": null,
    "api": {
      "update": {
        "url": "https://portal.absoluterx.com/api/clinics/diseases/1?api_key=<api_key>",
        "method": "PUT",
        "axios_method": "put"
      },
      "delete": {
        "url": "https://portal.absoluterx.com/api/clinics/diseases/1?api_key=<api_key>",
        "method": "DELETE",
        "axios_method": "delete"
      }
    }
  }
}
```

## PUT /api/clinics/diseases

Update an existing disease record for a given patient.

### Input Fields

#### name

string

#### OPTIONAL

example Tree Heart

The name of the disease.

### Request Sample

```
{
  "name": "Heart"
}
```

### Response Sample

```
{
  "data": {
    "id": 1,
    "patient_id": "123456789",
    "name": "Heart",
  }
}
```

```

    "created_at": "2019-08-11T22:50:02.000000Z",
    "updated_at": "2020-08-03T15:36:35.000000Z",

      }
    }
  }
}

```

## GET /api/clinics/medications

Returns a paginated list of medications of your patients.

Optional Filters

**page**

string

example 1

The page of the results you want returned.

**patient\_id**

string

example 123456789

The ID of the patient.

**name**

string

example Tylenol

The the name, or partial name, of the medication.

#### Response Sample

```
{
  "data": [
    {
      "id": 1,
      "patient_id": "123456789",
      "name": "Tylenol",
      "strength": "50 MG",
      "created_at": "2019-08-11T22:50:02.000000Z",
      "updated_at": "2020-08-03T15:36:35.000000Z",

    "total": 1
  }
}
```

# POST /api/clinics/medications

Create a new medication record for a given patient.

## Input Fields

### patient\_id

string

**REQUIRED**

example 123456789

The id number of the patient.

### name

string

**OPTIONAL**

example Tylenol

The name of the medication.

### strength

string

**OPTIONAL**

example 50 MG

The strength of the medication.

## Request Sample

```
{
  "patient_id": "123456789",
  "name": "Tylenol",
  "strength": "50 MG"
}
```

## Response Sample

```
{
  "data": {
    "id": 1,
    "patient_id": "123456789",
    "name": "Tylenol",
    "strength": "50 MG",

1?api_key=<api_key>",
        "method": "DELETE",
        "axios_method": "delete"
      }
    }
  }
}

```

## GET /api/clinics/products

Returns a paginated list of orders.

### Required Filters

**state**

string

example IA

The state abbreviation for the destination state of the product would be shipped to.

**physician\_id**

string

example 123456789

The ordering physician's ID number.

**Optional Filters**

**name**

string

example Anastrozole

The partial or full name of the product.

**sku**

string

example 470

The sku number of the product.

**Response Sample**

```
{
  "data": [
    {
      "id": 26,
      "sku": 470,
      "name": "Anastrozole",
      "strength": "1mg",
      "name_with_strength": "Anastrozole (1mg)",
      "compound": 0,
      "controlled": 0,
      "dispense": "Tablet",
      "label": "ANASTROZOLE - 1MG TABLET"
    }
  ]
}
```

## Webhook Notifications Setup

Follow these steps to configure your webhook and receive real-time notifications.

**Step 1: Access the Webhook Settings via <https://portal.absoluterx.com/clinics/preferences/webhook>**

Log in to your portal and Navigate to the Webhook Settings section.

**Step 2: Configure Webhook URL**

Webhook URL: Enter the URL where you want to receive the webhook notifications.

Select Request Method

Set Webhook Status

provide API Key

**Events**

**Supported Events**

**order\_created**  
**order\_completed**  
**order\_processed**  
**order\_waiting**  
**order\_filled**  
**order\_cancelled**  
**order\_assigned**  
**order\_approved**  
**order\_shipped**  
**order\_problem**  
**order\_rejected**  
**order\_received\_tracking**

example Configuration

Input Fields

**Webhook URL**

string

**REQUIRED**

example `https://yourdomain.com/webhook-receiver`

Enter the URL where you want to receive the webhook notifications.

**Request Method**

string

**REQUIRED**

Options: POST, GET

example POST

Choose the HTTP method you prefer for the webhook request.

**Is Active**

boolean

**REQUIRED**

Options: true, false

example true

Toggle the status to 'Active' to start receiving notifications.

**API Key**

string

**REQUIRED**

example `your-api-key`

Enter the API key that will be included in the headers of the webhook request to authenticate the sender.

**Additional Headers**

object

**REQUIRED**

example `{"Authorization": "Bearer your-token", "Custom-Header": "value"}`

Include any additional headers required for the webhook request.

**Additional Parameters**

object

**OPTIONAL**

example `{"param1": "value1", "param2": "value2"}`

If your webhook request requires additional parameters in the body, include

them in this section.

#### Request Sample

```
{
  "webhook_url": "https://yourdomain.com/webhook-receiver",
  "request_method": "POST",
  "is_active": true,
  "api_key": "your-api-key",
  "additional_headers": {
    "Authorization": "Bearer your-token",
    "Custom-Header": "value"
  },
  "additional_parameters": {
    "param1": "value1",
    "param2": "value2"
  }
}
```

#### Response Sample

```
{
  "data": {
    "status": "success",
    "message": "Webhook configuration saved successfully",
    "webhook": {
      "url": "https://yourdomain.com/webhook-receiver",
      "method": "POST",
      "active": true,
      "headers": {
        "Authorization": "Bearer your-token",
        "Custom-Header": "value"
      },
      "parameters": {
        "param1": "value1",
        "param2": "value2"
      },
      "created_at": "2024-06-25T13:25:09.000000Z",
      "updated_at": "2024-06-25T13:25:09.000000Z"
    }
  }
}
```

## GET /api/clinics/orders

Returns a paginated list of orders.

#### Optional Filters

##### **page**

string

example 1

The page of the results you want returned.

##### **number**

string

example 123456789

The order number.

##### **physician\_id**

string

example 123456789

The ordering physician's ID number.

**patient\_id**

string

example 123456789

The patient's ID number.

#### Response Sample

```
{
  "data": [
    {
      "number": 123456789,

## POST /api/clinics/orders

Create a new order.

### Pharmacy Transfer Orders

Pharmacies transferring prescriptions from clinics must:

- Use their pharmacy API key for authentication
- Include the `clinic_id` parameter to specify which clinic the order belongs to
- The order will be assigned to the specified clinic with automatic tracking of the pharmacy transfer

### Input Fields

#### **clinic\_id**

string

**OPTIONAL**

example 456

**For pharmacy transfers only:** The ID of the clinic this order should be assigned to. Regular clinics cannot specify this field - orders will automatically be assigned to their own clinic.

#### **patient\_id**

string

**REQUIRED**

example 123456789

The ID number of the patient.

#### **physician\_id**

string

**REQUIRED**

example 123456789

The id number of the prescriber.

#### **ship\_to\_clinic**

string

**REQUIRED**

Options: 1 = Yes, 0 = No

example 0

Is the order being shipped to the clinic or the patient?

#### **service\_type**

string

**REQUIRED**

Options: two\_day, rush, overnight, priority  
example two\_day

The shipping service type of the order.

**signature\_required**

string

**REQUIRED**

Options: 1 = Yes, 0 = No

example 1

If a signature is required, the driver will typically try to deliver the package up to three times.

**memo**

string

**REQUIRED**

example Your custom message.

Assign your own memo to the order.

**external\_id**

string

**OPTIONAL**

example ABC12345

Your clinic's internal ID to reference the order by.

**test\_order**

bool

**OPTIONAL**

example 1

If you're testing should be **1** if not use **0** instead

**products**

array of objects

**REQUIRED**

example Bacteriostatic Water (Manufactured)

**sku**

string

**REQUIRED**

example 123

The SKU number of the product.

**quantity**

string

**REQUIRED**

example 1

The product order quantity.

**refills**

string

**REQUIRED**

example 0

The number of refills prescribed.

**days\_supply**

string

**REQUIRED**

example 30

The number of days the prescription is good for.

**sig**

string (maximum of 98 characters)

**REQUIRED**

The prescriber's instructions to the pharmacist indicating how the patient should use the medication.

Do not use UAD or "USE AS DIRECTED" as it could lead to delays.

**medical\_necessity**

string

**REQUIRED**

Provide a brief explanation of the medical necessity for the prescribed product.

Patient has a history of diabetes and requires treatment to improve quality of life.

Request Sample

```

}

```

#### Transfer from Clinic B (ID: 20)

```

{
  "api_key": "pharmacy_api_key_abc123",
  "clinic_id": 20,
  "patient_id": 890,
  "physician_id": 567,
  "ship_to_clinic": 0,
  "service_type": "overnight",
  "signature_required": 1,
  "products": [
    {
      "sku": 2345,
      "quantity": 60,
      "refills": 1,
      "days_supply": 30,
      "sig": "Take 2 tablets by mouth daily"
    }
  ]
}

```

#### Note:

- The pharmacy uses the same API key for all transfers
- The `clinic_id` parameter determines which clinic owns the order
- Orders will automatically include the `transferred_from` field linking to the pharmacy

## GET /api/clinics/orders/{number}

Returns a single order record.

## DELETE /api/clinics/orders/{number}

Delete a individual order record.

Orders can only be deleted (cancelled) as long as they have not been shipped.

## PUT /api/clinics/orders/{number}/ patient-address

Update the patient address for a specific order.

Input Fields

**api\_key**

string
